SUMMARY

B.Tech AI & Data Science student skilled in Python, computer vision, deep learning, and LLM application development. Experienced in engineering practical AI projects involving driver fatigue monitoring, age-invariant face verification, and an adaptive AI study planner.

Technical Skills

- **Programming:** Python, Java, C
- **AI :** Machine Learning, Deep Learning, Computer Vision
- **Databases:** SQL

Education

Bachelor of Technology in Artificial Intelligence and Data Science **2023-2027**

- National Engineering College, Kovilpatti
- CGPA: 7.25

HSC

- Blossom Public School - Thanjavur **2022-2023**
- Percentage: 73.4%

Projects

- **Driver Drowsiness Detection System**
 - Built a real-time driver safety system using Python, OpenCV, and ESP32 to monitor alertness via Eye Aspect Ratio (EAR). Automated proactive hazard prevention through instant vibration alerts, multilingual voice prompts, and hardware safety triggers.
- **Age-Invariant Face Recognition for Long-Term Biometric Authentication**
 - Developed a deep learning face verification pipeline using facial landmark alignment and embedding-based cosine similarity to authenticate across significant age gaps. Benchmarked performance on UIDAI datasets using FMR, EER, and ROC curves.
- **StudyMate – AI-Powered Adaptive Learning & Study Planning Platform**
 - Architected an adaptive exam preparation platform using FastAPI, LangGraph, and PostgreSQL (pgvector) featuring autonomous web-grounded RAG. Built a dynamic feedback loop that grades quizzes semantically and automatically shifts study hours toward weak topics.

Internship

Application Developer Intern – Hostwire Systems Pvt. Ltd. **FEB 2026- APR 2026**

Talklze – Multi-Service E-Commerce & Booking Platform

- Developed and enhanced user interfaces for an existing application.
- Improved UI alignment, consistency, and visual structure across application screens.
- Identified and corrected UI inconsistencies to improve application maintainability and user experience.
- Refined existing application components while preserving established functionality.

Activities

- OpenCV workshop (PSG Tech), Python-based computer vision & image processing.

Non-Academic

- Student Volunteer – National Service Scheme, actively participated in teamwork, community engagement, and service activities.
